

## PHI Shingles Vaccine Survey

There is no medical evidence, to date, that polio survivors have any additional adverse effects from the shingles vaccine over those experienced by persons who never had polio. PHI has been asked several questions about the advisability of getting the shingles vaccine by polio survivors, so we'd like to get information from polio survivors about their experience(s) with the shingles vaccine. Please complete the brief six question survey. For background information, search the CDC's website or see PHI's article, "Shingles Vaccination: Should Polio Survivors Receive One?": [www.post-polio.org/edu/pphnews/PPH24-3su08p1-3.pdf](http://www.post-polio.org/edu/pphnews/PPH24-3su08p1-3.pdf)

Have you taken the shingles vaccine ZOSTAVAX® (Zoster Vaccine Live)?    Yes    No

If yes, did you have any problems upon getting the shot?    Yes    No

If yes, please explain. \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

How long ago did you get the vaccine? \_\_\_\_\_

Did you get shingles even though you had the vaccine?    Yes    No

If yes, please describe the severity of your case. \_\_\_\_\_
