## VENTILATOR USERS, NETWORKING

Long-term home mechanical ventilation users are an excellent resource for information about day-to-day living with a ventilator, and are willing to offer their experiences and wisdom. Below is a list of places to start to learn more about home mechanical ventilation, the equipment, and to become connected with others.

### INTERNATIONAL VENTILATOR USERS NETWORK (IVUN)

[www.ventusers.org](http://www.ventusers.org), [www.ventnews.org](http://www.ventnews.org)

#### Home Ventilator Guide

A comprehensive online resource (pdf format) that displays technical information about the world's home ventilators in charts that are easy to read and make comparing home ventilators more convenient.

[www.ventusers.org/edu/HomeVentGuide.pdf](http://www.ventusers.org/edu/HomeVentGuide.pdf)

#### IVUN's Ventilatory Equipment Exchange

People who want to donate ventilatory equipment and aids can advertise their offerings. People who need older equipment can view what is available and make arrangements for the equipment exchange and/or submit their equipment needs. **VENTILATOR EQUIPMENT AND AIDS** The products listed below are for use in long-term home care. The manufacturers generally sell or lease their home care ventilators and related equipment through distributors such as home health care companies. In the USA, a physician's prescription is necessary to obtain the equipment for insurance reimbursement. Many US companies have obtained the CE mark for the sale of their products in Europe. Some European companies have obtained FDA approval to sell their products in the USA. Please check the manufacturer's website to determine availability of products in your area.

**Manufacturers' websites are listed in alphabetical order on pages 29-30.**

## VENTILATOR CARE FACILITIES

The following facilities have been identified (but not endorsed by IVUN) as providing short, long or transitional care in a residential or skilled nursing facility for children and adults who use ventilators, either via a tracheostomy or a noninvasive interface. Many have specialized units for weaning critical care patients from a ventilator. Others provide general trach care, but do not have specialized units. They are arranged alphabetically by country, state, county and then by organization name.
